

WHEEL LOADER

JCB DOZER BLADE

FEATURES

- Easy design for conversion of wheeled loader to wheeled dozer.
- Bi-directional operation helps grading action both in forward and reverse for optimum grading.
- Dozer blade moves and pushes large amount of material quickly and easily, accomplishing jobs that would otherwise require dedicated equipment.
- Semi U-shape design blade for providing strength and to achieve optimum output.
- Usage of dozer blade in mines, construction sites and quarries helps to increase life of tyres and reduces parts consumption of allied equipment working at the site.

APPLICATION

- Backfilling around foundations
- Trenches
- Landscaping

TECHNICAL PARAMETERS
