HIGHWAYS MAINTENANCE

Our wide range of machines and attachments are ideal to perform the multitude of tasks required to maintain your highways. From pothole repairs to barrier reinstatement, ensuring your roads remain safe and dependable for all road users.

POTHOLE PRO

The award-winning JCB Pothole Pro is a unique 3-in-1 solution, specifically designed to permanently repair any pothole or large patching operation in as little as 8 minutes. It comes with 3 dedicated attachments to cut, crop and clean the area ready for reinstatement, so there's no need for additional specialist equipment or extra manpower, saving you both time and money. With a top roading speed of 40kph, the JCB Pothole Pro also allows easy travel between sites, enabling you to tackle road damage quickly and efficiently.

3CX COMPACT

The compact design of the JCB 3CX Compact Backhoe Loader makes it an ideal machine to work in urban areas and tight spaces. This makes it perfect for the development and upkeep of safe, reliable highway infrastructure, without compromising on power or efficiency.

TANDEM VIBRATORY ROLLERS

The JCB Tandem Vibratory Roller range has been designed to compact asphalt, ensuring durable and long-lasting road surfaces. They are the ideal solution for compacting reinstated areas to achieve optimal density and smoothness. They ensure the repaired sections of highway seamlessly integrate with the surrounding road surface for high quality, permanent repairs.

406 TOOLMASTER

As part of the Wheel Loading Shovel range, the powerful performance and compact design of the JCB 406 Toolmaster provides exceptional manoeuvrability due to the central articulated pivot point, making it ideal for rehandling materials in tight spaces. It also has the added benefit of a handheld tool circuit for greater versatility, operating breakers, and floor saws.

WASTE & RECYCLING

JCB has a wide range of machines that have proven invaluable in waste management operations. They all offer customers a safe and versatile solution for handling various materials efficiently, from loading and unloading refuse containers, to sorting recyclables and transporting waste materials.

WHEEL LOADING SHOVEL

The JCB 437 and 457 Wastemasters are part of our Wheel Loading Shovel range and are a trusted solution by waste management operations all over the world; boasting excellent efficiency, durability, and versatility. With a high lift capacity and specialised waste handling attachments, they excel at performing many strenuous tasks.

TELESCOPIC WHEEL LOADER

The JCB Telescopic Wheel Loader range is invaluable in waste management. Boasting the exceptional performance of a wheel loading shovel with the added versatility of a telescopic boom. Their manoeuvrability and compact designs allow for easy navigation in waste management facilities, while their robust capabilities ensure reliable performance even in demanding environments. These highly versatile machines are also compatible with a wide range of attachments, providing an excellent solution for handling a variety of materials.

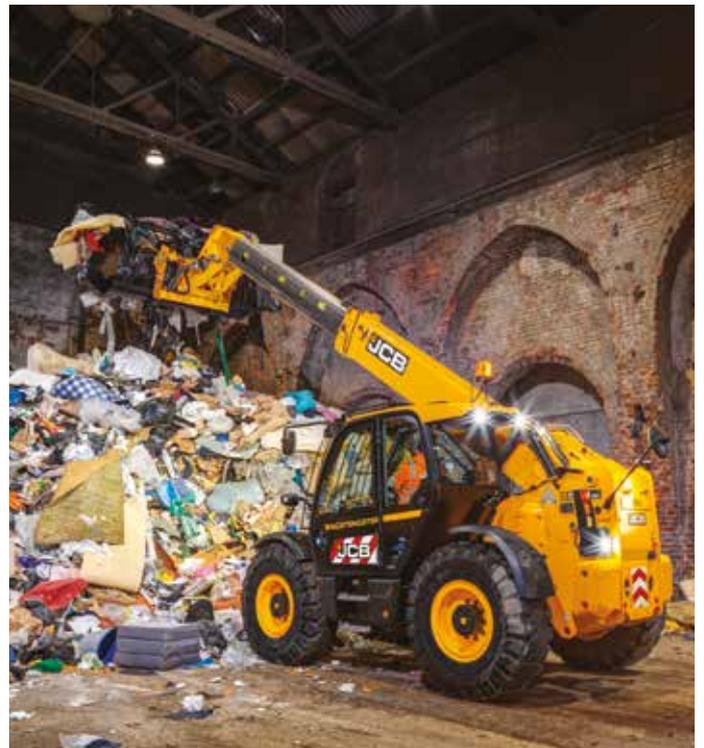

TELETRUK

The JCB Teletruk range is a versatile solution for waste and recycling operations, providing efficient and precise material handling capabilities. With its innovative telescopic boom design, the Teletruk offers unmatched forward reach and visibility, allowing operators to easily manoeuvre in tight spaces and access hard-to-reach areas. Equipped with a variety of attachments such as forks, grapples, and waste buckets, the Teletruk maximises productivity in many waste and recycling tasks.

EXCAVATORS

The JCB excavator range is a tough, reliable choice for waste and recycling operations, providing versatile and powerful machines for various tasks. With advanced features such as unique high-rise cabs offering unrivalled visibility and a wide range of attachments, they are ideal for material handling, sorting, and loading. With options for both wheeled and tracked machines, the JCB excavator range offers flexibility and manoeuvrability to suit different job site requirements in demanding waste management environments.

TELEHANDLER

The high lift capacity and specialised waste features of the JCB Telehandler Wastemaster range enable efficient handling of bulky waste materials, increasing productivity and streamlining operations across all recycling centres, landfills and waste management facilities.

WINTER MAINTENANCE

JCB's winter maintenance product range provides municipalities with reliable, durable and bespoke solutions for snow clearing, ice management, road maintenance and more during harsh winter conditions. They offer total peace of mind when dealing with extreme environments.

WHEEL LOADING SHOVEL

JCB Wheel Loading Shovels are essential tools for winter maintenance, enabling municipalities to efficiently clear roads, pathways and public spaces. With their powerful engines and robust construction, they can clear heavy loads of snow and ice with ease, as well as loading other equipment such as salt gritters, speeding up the clearance process and ensuring safer road conditions. Equipped with features such as heated cabs and industry leading transmission technology, JCB Wheel Loading Shovels offer operators comfort and control, even in the harshest weather.

FASTRAC iCON

The JCB Fastrac iCON is an excellent option for winter maintenance operations, offering municipalities a versatile and efficient solution for keeping roads and public spaces safe during the coldest months. Available with travel speeds of up to 60kph, advanced iCON technology and features such as intelligent GPS guidance and highly configurable application systems, it ensures accurate and effective deployment of de-icing agents and road treatments. Its robust design and powerful engine provide reliable performance even in harsh winter conditions, for clearing snow, ice and debris. With the JCB Fastrac iCON, municipalities can quickly enhance road safety and minimise disruptions caused by winter weather, ensuring smooth and reliable transportation for residents.

TELEHANDLER

The JCB Telehandler range plays a vital role in winter maintenance duties to combat many cold weather challenges. These machines are ideal for tasks like loading winter maintenance trucks, material handling at height and infrastructure upkeep during the long winter months. With their sturdy structures, powerful engines and versatile attachments, JCB Telehandlers effortlessly manage heavy loads at heights due to their high capacity telescopic booms making them a great choice for your winter maintenance needs.

LANDSCAPING, GROUND CARE & FORESTRY

JCB offers a variety of machines tailored to Landscaping, Ground Care and Forestry. With powerful performance and specialised features ideally suited to tasks such as land preparation, ground clearance and mulching, they are perfectly adapted to helping local authorities enhance green spaces and maintain public areas.

FASTRAC iCON

The JCB Fastrac iCON offers revolutionary in-cab technology and unmatched versatility, providing the ultimate tool to tackle landscaping and forestry jobs, from clearing ditches and mowing verges to trimming hedgerows and chipping wood. With its ability to seamlessly integrate with various attachments, such as mulchers, grapples, and soil tillers, whilst travelling at 60kph, the Fastrac iCON maximises productivity and delivers exceptional results across a diverse range of applications.

HYDRADIG

The JCB Hydradig is a great choice for landscaping and forestry tasks with unrivalled visibility and a wide range of attachments, from rock saws to forestry grapples. This enables it to offer unparalleled versatility, making it ideal for numerous tasks such as ditch clearing, mowing, excavating and material handling. In addition, all service points are at ground level for easy machine maintenance.

SKID STEER LOADER

The JCB Skid Steer Loader range is a safe and versatile solution for both landscaping and forestry applications, offering the flexibility and power needed to tackle a variety of tasks with precision and efficiency. These compact machines are perfect for jobs such as clearing bushes, moving logs and maintaining trails, to enhance open spaces and woodlands, utilising a wide range of attachments available, including buckets, grapples, and mulchers. The JCB Skid Steer Loader range offers unrivalled safety thanks to its unique side-entry door. Combining versatility, safety, and a compact design; this range of machines can meet the diverse demands of landscaping and forestry projects with ease.

MINI EXCAVATORS

JCB Mini Excavators are versatile machines, making them ideal for many landscaping and ground care applications; from creating flower beds, installing irrigation systems, or shaping terrain features. Their compact size and manoeuvrability make them perfect for navigating tight spaces and delicate terrain, allowing for precise excavation, grading, and trenching tasks. With a range from 1 to 10 tonnes including models ideal for trailer towing, JCB Mini Excavators deliver efficiency and precision for any jobs.

WHEEL LOADING SHOVELS

The JCB Wheel Loading Shovel range can offer a vital role in landscaping and forestry work, providing the power and efficiency needed to handle a variety of tasks with ease. Our compact machines are ideal for urban landscaping projects in parks and public spaces; whilst the large Wheel Loading Shovels provide the power and performance for heavy-duty forestry work. Whether it's loading mulch, clearing debris, or moving logs, these reliable and robust machines prove indispensable.

UTILITIES

JCB offer a range of machine solutions specifically designed to help municipalities efficiently manage all their utility operations, including water, gas, electric and telecommunications.

MINI EXCAVATORS

The JCB Mini Excavator range is a vital asset for utility work, offering precision and efficiency in tight spaces. These compact machines are ideal for tasks such as trenching, pipe laying and maintenance of water, gas and electrical infrastructure. With advanced features and ergonomic design, including variable track widths, optional zero tailswing and intuitive controls, JCB Mini Excavators ensure optimal performance and operator comfort, boosting productivity and safety in utility operations.

BACKHOE LOADER

JCB's iconic Backhoe Loaders are essential tools for utility work, offering versatility and powerful capabilities in one machine. With roading speeds of up to 50kph and models with four-wheel steering for maximum manoeuvrability, JCB Backhoe Loaders increase uptime and productivity on and off site. With many useful and durable attachments, they excel in digging trenches, excavating and installing utility lines such as water, gas, and electricity.

HYDRADIG

The JCB Hydradig offers numerous benefits for utility work. Its innovative design with minimal tailswing offers excellent visibility and provides optimal manoeuvrability and safety in tight urban spaces. With its versatile capabilities, including precise digging, lifting and material handling, the Hydradig makes tasks such as trenching, pipe laying and maintenance easy, boosting productivity and efficiency on the job.

PUBLIC BUILDING MAINTENANCE

JCB offer a range of products tailored to public building maintenance. They provide municipalities with reliable solutions to perform various maintenance tasks, ensuring buildings remain safe, functional and aesthetically pleasing for all.

ROTATING TELEHANDLER

The JCB Rotating Telehandler is an indispensable tool for public building maintenance work, offering municipalities unparalleled versatility and efficiency. With its innovative rotating capability, these machines provide access to hard-to-reach areas due to exceptional lift heights and capabilities. Making the JCB Rotating Telehandler range ideal for tasks such as window cleaning, facade maintenance and roof repairs easy. Their robust construction, smooth hydraulics and telescopic boom enable precise positioning and lifting of materials, whilst its four-wheel steering allows greater manoeuvrability in confined spaces, enhancing productivity and safety on site.

ACCESS

The JCB Access range consisting of a variety of solutions from scissor lifts to articulated booms with multiple advanced safety features, ideal for maintenance work on public buildings, offering easy access to elevated areas. Whether it's window cleaning, building servicing or roof repairs, these machines provide safe and easy access to those hard-to-reach places.

EMERGENCY SERVICES

JCB has a suite of products specifically tailored to meet the demanding needs of emergency services, ensuring rapid and effective response in critical situations. They allow emergency services to enhance operational efficiency, minimise downtime and ensure the safety and well-being of communities during challenging times.

BACKHOE LOADER

JCB Backhoe Loaders serve as essential tools for emergency services, offering versatility and power in critical situations. Their robust construction and powerful capabilities ensure efficient operation in challenging environments, enabling emergency responders to swiftly navigate and address emergencies with confidence and effectiveness. Designed with a powerful front-loading shovel ideal for removing fallen trees or clearing up debris after a natural disaster, along with a rear excavating arm suitable for building flood defences and delicate excavations. Backhoe Loaders play a crucial role in supporting the emergency services, ensuring the safety and well-being of communities during a crisis.

TELEHANDLER

The JCB Telehandler is an invaluable machine for emergency services, offering versatile access to hard-to-reach areas during rescue and recovery operations due to its exceptional lift heights. With its innovative capability, this machine facilitates swift and efficient deployment of personnel and equipment in critical situations. Whether it's rescuing individuals from elevated structures or accessing inaccessible areas in disaster zones, the JCB Telehandler is a vital piece of equipment for fire departments, search and rescue teams and other emergency services.

ZERO EMISSIONS

The pioneering range of JCB E-TECH machines are 100% electric with zero emissions, offering a sustainable and eco-friendly solution for your equipment needs. By transitioning to electric-powered machines, municipalities can enjoy a host of benefits, including quieter operation, minimal service requirements, cleaner air quality in urban areas and reduced carbon emissions. These electric machines offer not only environmental advantages but also enhanced operational efficiency and lower long-term operating costs. With their innovative technology and commitment to sustainability, the JCB E-TECH range empowers municipalities to lead the way in responsible resource management while contributing to healthier and more sustainable communities.

The logo features the text 'LIVE JCB LINK' in a bold, white, sans-serif font. The 'JCB' portion is enclosed in a yellow square with a white border. Two yellow curved arrows, one pointing up and one pointing down, are positioned behind the 'JCB' text, creating a circular motion effect.

LIVE JCB LINK

JCB LiveLink is an innovative telematics system that provides municipalities with valuable insights and control over their fleet operations, optimising efficiency and productivity and maximising the lifespan of their equipment. With real-time monitoring of machine performance, location tracking and maintenance alerts, LiveLink enables proactive fleet management, reducing downtime and minimising maintenance costs. Municipalities can also remotely access data and diagnostics 24/7, allowing for better decision-making and resource allocation. Additionally, you can set custom security notifications with geofences and out of hours alerts, to help prevent unauthorised use.
